

# RF ACE TURRET 40, RF ACE TURRET 40X

## RF MONO PEDESTALS

Powerful RF (Radio-Frequency) mono system designed to operate as a strong and reliable single antenna, but also in two or more antenna configurations. With excellent detection of adhesive labels and hard tags the ACE TURRET systems are an ideal solution for supermarkets, hypermarkets, fashion stores and boutiques.

The modern aluminum frame design of the TURRET pedestal, with space for advertisement banners, is aesthetically appealing yet durable enough to withstand a high traffic environment. If visual transparency is a priority over printed advertising, our TURRET-X design is the perfect solution.

It can also be connected to the StoreMonitor cloud for advanced system and store performance reports and analytics.

In addition to these powerful features our systems are **ECO MODE** enabled. This power-saving tool helps you minimize electricity consumption which increases the lifespan of the system, saves costs, and is environmentally friendly.

**STOREMONITOR** COMPATIBLE 

### Features & options:

- Remote maintenance and diagnostics
- StoreMonitor connectivity
- Advertisement space
- Metal detection
- Visitor counting
- Smart directional alarms
- Tag too close indication
- Integrated doorbell
- **ECO MODE** enabled systems

**Integrated smart visitor counting** and data collection through our StoreMonitor cloud application will provide you with essential data you need, not only to monitor the system functionality and status, but to provide valuable insights into your store performance and sales efficiency.

**Remote connectivity** and data collection are standard inbuilt features of the RF ACE systems. It ensures that our systems are not only easy to install but can also be serviced and maintained remotely with fast response and without unnecessary travel costs.

An **advertisement** panel on your security system can be an additional sales tool with our “easy slide” access to printed banner replacement. An identical pedestal but without the opaque panel, the Profi X pedestal features a transparent acrylic surface that blends in with the surrounding space.

For retailers facing losses due to professional shoplifters equipped with foil-lined bags, the classic pedestal line can be upgraded with our integrated NG METAL SPY, providing the maximum protection that you can expect from an article surveillance system.

When connected to our Storemonitor cloud analytics all essential data from visitor counters, alarm management and system operation are available for further processing. You can evaluate your store or system performance in advanced graphs and overviews or set up reports to be automatically sent to your mailbox or uploaded to your existing system.
